

Health Check Service Package For Nitrogen Membrane Systems

“In just a few hours, we’ll analyze your nitrogen system and show you how to keep it running at peak efficiency.”
Steinar Haugland,
After Sales Manager

Air Products’ Nitrogen membrane systems are designed to operate reliably for many years. To achieve a long service life, schedule a Health Check Service Package at least once per year.

Packages include:

- 1 day (10 hour) service
- Complete inspection and tune-up of nitrogen membrane system
- Training of crew members in system operation
- Comprehensive report published by service engineer

How it works:

Schedule the health check service when the ship is in port or another convenient location where service engineers can easily access the nitrogen membrane system. The service engineer will complete the full nitrogen system diagnostics test and crew training in one day. Air Products service engineers are located in Norway and Korea. Our service partners are located in Singapore, Dubai and USA. Find a technician near you on our website:
<http://www.airproducts.no/service>

Health Checks

The Service Engineer will complete the following:

- Visual inspection of complete nitrogen system including piping, valves, membranes, electrical, compressor (etc.)
- Operation check, recommended running condition including the compressor
- Oxygen analyzer calibration
- Re-tuning controller settings for optimized performance
- Performance diagnostics test on nitrogen flow and oxygen content
- Alarm test and adjustments
- Filter inspection
- Maintenance schedule review
- Compressor oil change service
- Spare parts inventory count and recommendation
- Operation and maintenance training of crew members
- Final report of findings

Using original Air Products and TMC compressor spare parts and labor is a safe and valuable investment. Avoid costly repairs and downtime by following the annual health check service routine.

"The onboard health check is an excellent opportunity for crew members to gain transfer of experience and know-how."
Rune Damsgaard, Business Director
